DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 20, the term "oriented as in use" is unclear as to what is intended, or as to the orientation in use is vertical or horizontal.
2. Claim 20 recites the limitation "tank" in step (c), line 3. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

3. Claims 1-14, 16-9 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-19 of copending Application No. 10/146,934. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
4. Claims 15 and 20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15 and claim 1 respectively of copending Application No. 10/146,934. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the elements of the apparatus of claim 20 are included in the structure of the apparatus of claim 1 of the pending application ('934). The limitations of claim 15 of the present invention includes the structure of the apparatus of claim 15 of the pending application, except that additional functions are included in the pending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references represent the state of the art in framed hollow fiber membrane modules. Reference 5,484,528 shows removable or slidable bundles from and holding plate, in a vertical position within a tank.
